

Introduction

The Netherlands is a constituent country located in Western Europe and with territories in the Caribbean. It is bordered by Belgium and Germany. The Netherlands is mostly low-lying, located at the mouths of three major European rivers (Rhine, Meuse, and Schelde). The government system is a parliamentary constitutional monarchy; the chief of state is the king, and the head of government is the prime minister. The Netherlands has a mixed economic system which includes a variety of private freedom, combined with centralized economic planning and government regulation. Netherlands is a member of the European Union (EU).

Inward FDI Potential Index	13 / 139
KOF Index of Globalization	1 / 185
Networked Readiness Index (NRI)	6 / 139

Risk Assessment (Provided by Coface)

Country rating: A2 - The political and economic situation is good. A basically stable and efficient business environment nonetheless leaves room for improvement. Corporate default probability is low on average.

Business Climate rating: B - The business environment is mediocre. The availability and the reliability of corporate financial information vary widely. Debt collection can sometimes be difficult. The institutional framework has a few troublesome weaknesses. Intercompany transactions run appreciable risks in the unstable, largely inefficient environments rated B.

Strengths

- Focus on professional services, such as law or financial companies, and international trade, strong port activity (Rotterdam is Europe's No. 1 port and in the global Top 10)
- Diversified exports (in 2022, 49% of exports were goods, 39% services and 12% re-exports)
- Strong digitalisation
- High quality infrastructure and very good living standards
- Low level of public debt

Weaknesses

- Large exposure to the European economy (77% of all goods exports in 2023, representing 50% of nominal GDP), especially Germany (23% of all exports, 15% of nominal GDP)
- Relatively strong focus on polluting agriculture including livestock farming: nitrogen-emissions are still far higher than the EU targets
- Private household debt levels are relatively high, but decreasing rapidly (185% of disposable income in 2023)
- Ageing population, pension system under pressure
