

Introduction

Pakistan is a country located in South Asia. It has a coastline along the Arabia Sea and the Gulf of Oman and is bordered by Afghanistan, China, India, and Iran. The geography of Pakistan is diverse with the Thar Desert in the east and the Hindu Kush and Pamir mountain ranges in the north. The government system is a federal parliamentary republic; the chief of state is the president, and the head of government is the prime minister. Pakistan has a mixed economic system with a combination of free-market activity and government intervention. Pakistan is a member of the South Asian Association for Regional Cooperation (SAARC).

Open Budget Index	54 / 114

Risk Assessment (Provided by Coface)

Country rating: D - A high-risk political and economic situation and an often very difficult business environment can have a very significant impact on corporate payment behavior. Corporate default probability is very high.

Business Climate rating: C - The business environment is difficult. Corporate financial information is often unavailable and when available often unreliable. Debt collection is unpredictable. The institutional framework has many troublesome weaknesses. Intercompany transactions run major risks in the difficult environments rated C.

Strengths

- Large internal market supported by dynamic demographics
- Large remittances from migrant workers
- Large and inexpensive labor force
- Development of economic corridors with China and Central Asia, door to the Indian Ocean
- A major player in Islamic finance
- Mineral potential

Weaknesses

- Tense neighborhood, political fragility and domestic insecurity
- Informality (40% of GDP and 60% of employment) and low tax revenues (14.5% of GDP)
- Inadequate education (40% illiterate, three parallel systems producing three hardly connected groups), health, infrastructure and agriculture
- Delayed development of Balochistan, favoring separatism, and rural areas, conducive to the development of radical Islamism
- Energy dependency (oil = 25% of imports), deficient electricity production
- Weak manufacturing (20% of GDP) and export base, weak sectoral diversification
- 20% of GDP and 40% of the workforce depend on the agricultural sector, which is sensitive to climatic hazards and global prices
